

Ultrasound reimaged

Bringing fertility and pregnancy
into focus for conception rate
success

The future starts here

Fertility and Pregnancy in Focus

BovIntel revolutionises farm ultrasound for fertility and pregnancy diagnosis. It detects, highlights and labels reproductive structures on screen, enabling vets to pinpoint cycle stage.

With CFM and AI, it helps to identify non-pregnancy from day 20 (saving €11 per open cow/day) and improves ET recipient selection. It helps to triple scanning speed and accuracy with embryo detection and ageing.

What is BovIntel?

Exclusiveto the Easi-Scan:Go, BovIntel is a simple add-on to the Go:Scan app. As you scan, it will automatically:

- ✓ Identify the Ovary, Corpus Luteum, Follicles, Cysts on the screen
- ✓ Measure CL vascularisation
- ✓ Identify embryo and calculate ageing
- ✓ Highlight and label the structures/embryo in colour on your tablet or BUG:Go
- ✓ Take and display precise measurements in mm, % or days

Who benefits from BovIntel?

Vet employed by practice

- Speed up the scanning process on-farm by up to 3 times
- Finetune breeding advice to clients
- Contribute to dairy farm productivity increases

Vet employed by farm

- Reduce up to 18 non-reproductive days
- Speed up the scanning process on-farm by up to 3 times
- Use BovIntel as a second opinion confirming diagnosis

Newly qualified vets

- Improve accuracy of the pregnancy detection
- Build confidence in interpreting ultrasound images
- Faster learning curve and confidence

ET vet

- Improve ET efficiency by 12%
- Cost savings from reduced loss of genetically valuable embryos
- Precise measurements at-a-glance to choose the best recipients

Easi-Scan:Go users can access a FREE 90-day trial of BovIntel via the Go:Scan app. After your trial, continue using BovIntel on a subscription basis.
